## REETHERMALIZERS: NITRO™ POWER RETHERMALIZER

**MODELS:** 72090 120V AC, 1440 W

Nitro™ Power Rethermalizer

### DESCRIPTION

Rethermalizer is sized to hold one full-size pan or equivalent fractional pans (adaptor bars recommended with fractional pans). The 1440 watt element is designed to operate on 120V, 15A service. Unit has a deeper stainless steel well for greater water capacity. Bulb and capillary thermostat for precise temperature control.

### FEATURES

- ☐ 18-8 stainless steel well
- ☐ High-efficiency 1440 watt element that operates on 15A circuit
- ☐ Almost twice the water capacity of other countertop models, reducing need to refill the well as often
- ☐ Holds with wet or dry heat – moist heat always recommended for best performance and preserving food quality.
- ☐ Recommended using full or fractional size pans up to 4" (10.2 cm) deep
- ☐ Heavy-duty bulb and capillary thermostat with overtemp protection
- ☐ Adjustable 1" (2.5 cm) feet
- ☐ Meets NSF4 performance standards when using moist heat
- ☐ 6-ft. (183 cm) cord and plug

### PERFORMANCE CRITERIA

Nitro Cookers are designed to take a container of cooked food from a chilled state (below 40.0° F [4.4° C]) through the HACCP "danger zone" of 165° F (73.9° C) in less than 90 minutes. The performance standard is measured using the NSF mixture chilled to 35° F (1.7° C). The electric unit will raise the temperature of this product above 165° F (73.9° C) in less than 90 minutes. The temperature will be maintained above 150° F (65.6° C) when the food product and pan or inset are used with a standard pan or inset cover, the proper water level is maintained in the well, and the food product is stirred regularly.
