

# PTFE Release Sheet

## CARE AND USE INSTRUCTIONS

---

- Wash release sheet before first use.
  - Hand wash with soft cloth and air dry daily for best results.
  - Clean with mild detergents only, avoid using chemical cleaners or solvents.
  - Maximum operating temperature is 550° F.
  - Do not scrape the sheet surface with a hard-edged implement or use abrasive cleaning materials to clean.
  - PTFE sheets are dishwasher safe.
  - For use in indirect heat applications only. Do not expose to direct contact with flame or radiant coils.
  - Rotate face up side of sheet daily.
  - Do not use grease or oils on sheet surface.
  - Replace sheet when non-stick finish shows wear or edges begin to fray or crack.
-
