Why Replace Gaskets?

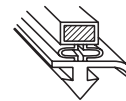

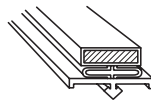

It can help....

Reduce food spoilage due to improper temperature retention

Reduce energy costs when the gasket forms a proper seal

Keep your cooler sanitary

Helpful Gasket Installation Hints

Measurements are from gasket's outside corner to outside corner and may vary slightly

- 1 Clean** door well where gasket attaches
- 2 Soak** in 160° F water to remove twists and kinks before installing
- 3 Heat** with hair dryer after installing (be careful not to melt material)
- 4** New gasket will take several weeks to form it maximum seal
