

CDN brings new functionality and convenience to its best-selling ProAccurate[®] Insta-Read[®] Cooking (IRT220) and Beverage & Frothing Thermometers (IRB220-F, IRB220-F-6.5 and IRTL220).

Each of these thermometers now features a handy recalibration tool on the thermometer's sheath, making it easy to ensure the high level of accuracy required in the best coffee shops, restaurants and commercial kitchens.

Recalibration is easy with the new Recalibration Tool on Sheath. Just immerse the thermometer in sheath in at least two inches of ice water, and then use the calibration tool to adjust the hex nut beneath the dial to 34°F. Recalibration can also be accomplished by immersing it in boiling water and adjusting to the appropriate temperature.

Designed with the professional chef in mind, these CDN ProAccurate[®] Insta-Read[®] Thermometers are NSF[®] approved, and they carry a 5-year limited warranty.
